

Erkel Field

Alpha Site

LEI

Surveyed

10/6/13

Location

SEC/TWP/RNG: 2-111-25

Nearest Water Source: Rice Lake to the Southwest

Physiographic Setting

General Upland Area

Surface:

Visibility: 50%

Agricultural field, freshly tilled.

Current Land Use

Agricultural Field

Personnel

Cory Nowak | Joshua B. Anderson | Joshua C. Anderson | Duncan Widman | Jason Reichel

Methodology

Surface collection done by sweeping across the field on foot. | 5 meter intervals between surveyors. | GPS points taken for the perimeter of the field. | GPS point taken on artifact found.

Results

1 Lithic

No artifacts found with diagnostic properties.

Owner

Floyd and Ellen Erkel

Notes

- Representative from LE Pioneer Power company stopped by and gave permission to test part of the meadow located in the northern portion of LEI.
- Soiled probed the meadow and results showed it had used to be underwater, decided not to shovel test.

- As proposed early in the year, we made an attempt to revisit Alpha sites in Le Sueur. However, this was considered an Alpha site because of a vague rumor of a campsite possibly being within an entire section.
- May be a campsite somewhere within the section of LEI, but certainly doesn't appear to be on this parcel.
