

**LEf Stenzel****Date of Fieldwork**

4/25/14

4/26/14

**Location**

SEC/TWP/RNG: 35 & 36-112-23

South of Sanborn Lake

Part of Alpha site LEf

**Parcels**

07.036.7500

07.035.5200

**Owner Address**

508 4TH ST NW, MONTGOMERY, MN 56069

**Physiographic Setting**

Lakeshore; General Lake Area

**Surface**

Visibility: 55-65%

Surface Type: Corn field, harvested

**Current Land Use**

Agricultural Field; Corn Field

**Threats to Site**

Agriculture

**Soil**

Moderately Disturbed

Silty Loam, soil horizon at 25 CMBS then sandy silt.

**Landscape**

Gradual and low rolling hills near the southern shoreline of a lake. East of a creek, southeast of prehistoric waters. Agricultural fields with rolling hills located between Lake Sandborn and Diets Lake.

**Weather**

Varied, 50-60 degrees.

**Personnel**

Cory Nowak

Joshua B. Anderson

Joshua C. Anderson

Emily Evenson

Ty Warmka  
Duncan Widman  
Adam Peterson  
Heather Rudd  
Volunteers: Paige & JD

### **Work Type**

Phase 1: Surface Collection

### **Methodology**

Surface conducted at 2 meter intervals between surveyors on line going southeast and northwest.  
Surveyors dispersed within and around high probability areas to locate artifact concentrations.  
Artifact concentrations intensively surveyed.  
GPS point taken on each individual artifact in the surface collection.

### **Results**

# lithics found.  
0 faunal  
0 floral  
0 pottery

### **Owner**

Dale Stenzel

### **Notes**

- Northern portion of Alpha site LEf
- Southeast of what is likely the main habitation site in immediate area
- No clear concentrations found within the field.
- Alpha site dimensions given are due to there have been no follow up to a reported campsite, any references to sites within the general area are likely the outskirts of the main site Northwest
- One projectile point found.
- Further survey after planting may reveal a higher concentration density.
- All adjacent fields also yielded small scatter of lithics.
